

Dr Manash Pratim Sarmah, Principal Scientist, Jubilant Chemsys Limited, Noida delivered expert talk on "**Disconnection approach in Organic-Synthesis**" under Industry-Institute Interaction on 19.08.2019 at 02:00pm in NKN Hall of NIT Jalandhar.

Dr Manash Pratim Sarmah put his views about the Chemistry Department of NIT Jalandhar. Comments of Dr Manash Pratim Sarmah are:

This is my second visit to NIT Jalandhar. I found a lot of visible changes in academic and R & D environment since my last visit in March 2018. Faculty members of Chemistry Department are putting good efforts to improve the academic/R & D activities of the Department.

The knowledge quality of the M.Sc. students and PhD scholar is very good. The approach taken for industry academia collaborations is appreciable and Prof. B S Kaith is making good effect in that direction.

I would like to recommend for investment towards the infrastructure and applied research programs. Students should go for industry during summer vacations for summer training etc. for better lab exposure.

Overall the organization is moving in the right direction for bright future of students.

I wish all success to NIT Jalandhar for academic achievements.
