

## Bring me something

WeCan NIT-J conducted “Bring me something” on October 10, 2021 (Sunday). The event was conducted in online mode on Google Meet. It was attended by over 35 students and presided over jointly by 2<sup>nd</sup> and pre final year of WeCan.

The core or the motive of the event was inculcating and developing traits such as convincing power listening, marketing skills. The event saw active participation students and also helped us to clear the queries of the students regarding the event, the club WeCan and its functioning.

The focus of this event as marketing skills i.e. If you got a chance of selling company's product to anyone then how would one sell or in other words how would one approach others for selling the products. This was even a beneficial drill for interviews as well. During the conclusion of the event a feedback was taken from the students regarding the event and a vote of thanks was issued by the pre-final year students and second year students for the participants.

The enthusiasm and positive responses were overwhelming as students showed high interest in participating in more of such events in the future.
