

Prof. Y D Vankar (Emeritus) Department of Chemistry, Indian Institute of Technology (IIT) Kanpur delivered expert talk on "**Reagents in Organic Transformations**" in NIT Jalandhar on 19.08.2019 at 09:00am.

Prof. Y D Vankar put his views about the Department of Chemistry, NIT Jalandhar. His comments are:

It was a pleasure for me to visit the Department of Chemistry, NIT Jalandhar again. I have visited this Department many times ever since the M.Sc. programme was introduced. I had the privilege to interact both with the faculty and students of the Department every time I visited here. I have witnessed a continued improvement in terms of infrastructure and quality of students and faculty. It is heartening to see a lot of enthusiasm among students to attend lectures and interact with guest speakers. The same goes for the faculty.

What is now needed to significantly increase the instrumental and laboratory facilities for better output and motivating both faculty and students to excel. I am sure in near future, I will have the opportunity to see NITJ Chemistry Department as one of the top Departments in our country both form education and research.

I wish all the best.

Professor (Emeritus) Y D Vankar (HAG), FNA, FASc
