

DEPARTMENT OF CIVIL ENGINEERING

Vision

To emerge as a nationally recognized centre of excellence in the science and application of civil engineering, fuelled by a rigorous and dynamic academic programme nurturing research and development in cutting edge areas, with strong emphasis on Industry linkages by way of rendering state of the art consultancy services.

Mission

To impart quality civil engineering education attuned to the needs of the Industry with emphasis on practical exposure aided by well-equipped laboratories, which in turn feed a vigorous research and development programme in addition to creating capabilities for industrial consultancy.

Quality Policy

We are committed to contribute effectively by producing a quality human resource of world standard in the field of Civil Engineering through sustainable education system to meet the changing technological needs of the Country by

- Developing value added industry oriented curriculum, excellent teaching and learning processes.
- Developing sustainable research and consultancy environment with particular emphasis on sponsored research, thus leading to quality publications.
- Developing state of the art technical infrastructure to motivate the students to realize their dreams.
- Developing managerial skills through extracurricular activities for the overall development of the students.
- Engaging the faculty and students in the development of community services by linking with schools and communities in contrasting localities to raise awareness of diversity and global issues.
