

Vision of the Department

The Department aspires to be recognized nationally and internationally for exceptionally good engineering and research producing well-qualified engineers, who are innovators, leaders and can serve the society.

Mission of the Department

M1: To impart high quality technical education and skill enhancement to the students so that they become globally competitive mechanical engineers.

M2: To provide conducive environment and state-of-the-art facilities for carrying out research.

M3: To widen treaties with world class R&D organizations, premiere educational institutes and industries for excellence in teaching, research, entrepreneurship and consultancy services.

M4: To provide a conducive academic environment to the students coupled with ethics and leadership traits.

Program Educational Objectives (PEOs)

PEO1: To train graduates with a firm foundation in Engineering, Sciences and Technology for a thriving career in Mechanical Engineering.

PEO2: To prepare graduates to develop into effective collaborators/innovators in efforts to address social, technical and engineering challenges.

PEO3: To prepare graduates to engage in professional development through self-study, Online/Offline learning and industrial exposure in engineering and business.

PEO4: To equip graduates with integrity and ethical values so as to enable to become responsible engineers.
