About the Short-Term Course

This course is intended to provide a platform and opportunity to discuss the recent trends in the Industrial and Production Engineering with a broad objective of furthering the individual and inter disciplinary research and development activities in the technical institutions. This online short-term course would certainly be beneficial for developing the more desirable skill set to pursue the research and development activities in the field of Industrial and Production Engineering. At the end of the course the participants will be well equipped with an enhancement of understanding of various fields of research to pursue their carriers in Industry/Academics/Research.

In this short-term course, resource persons of eminence from various organizations will deliver expert lectures and discuss the latest research issues on various topics like:

- Supply Chain and Logistics
- Human Factor Engineering
- Lean Six Sigma, TQM
- Life Cycle Assessment
- Welding Technology
- Metal Finishing Techniques
- Internet of Things

Registration

The participant should register by paying registration fees and filling Google form through the link given below

https://www.nitj.ac.in/events_registration/recent_advances_ipe/login

Registration is compulsory for all the delegates. The registration fee is non-refundable.

Registration fess – **Rs. 150 + 18 % GST (External/Outside NIT Jalandhar candidate)**
